## EXPERIENCE

### Advanced Application Engineering Analyst

#### Accenture

Nov 2022 – Ongoing

Bengaluru, India

- Implemented solutions for over 25 types of high-security vulnerabilities, including **DDoS attacks**, **malicious file uploads**, **bypassable business logic**, **privilege escalation**, and more, across 6 Angular + .NET API applications.
- Successfully created an IT Simulation application for Accenture from scratch, utilizing skills in **Angular (Frontend)**, **.NET**, and **SQL Server (Backend + Database)**, and deployed it on **AWS (web)**, **Azure (API)**, and **Azure SQL (database)**
- Successfully replaced paid **Syncfusion packages** with free **NPM packages**, along with code changes in the respective components, and upgraded the **Angular version** to the latest in 5 applications to stay updated with the latest **NPM packages** and ensure compatibility with Angular's current version.
- Successfully resolved over **40 API issues** in an **Angular + .NET application** through meticulous debugging and code analysis.
- Successfully completed over **40 user stories** for enhancements in 3 applications, resulting in **faster performance** achieved through code size reduction, decreased time complexity, elimination of unnecessary object initialization, comprehensive **exception handling**, and implementation of a **loosely coupled** code structure.

### Programmer Analyst Trainee

#### Cognizant

Mar 2022 – Aug 2022

Bengaluru, India

- Learnt Technologies which includes **HTML**, **CSS**, **Javascript**, **JAVA**, **SQL** and **RDBMS**.

## TECHNICAL SKILLS

Languages - **Java**, **C-Sharp**, **SQL**.
